# À PROPOS

## AN ESTABLISHED NAME IN AUDIO-VISUAL ACCESSORIES

The ERARD Group specializes in audiovisual materials for use in homes, businesses, industry and public spaces. Its continuing growth draws on the development of 4 companies: ERARD®, ERARD® PRO, ERARD® D3C and ERARD® INDUSTRIE.

**ERARD®** designs and markets solutions for the integration and connection of consumer audiovisual equipment: aerial accessories, mounts, furniture for television sets and connection systems.

**ERARD® Pro** develops and markets solutions for the integration of professional audiovisual equipment: indoor and outdoor enclosures for flat screens, TV columns, video projector mounts...

**ERARD® D3C** is a specialist in audio, video and data signal processing. It manufactures custom-made cables for many sectors: audiovisual, IT, industry, medical... It also markets cables, connectors and leads, well-known for their manufacturing quality.

**ERARD® INDUSTRIE** manufactures ERARD products, providing external companies with co-development and production services as an industrial subcontractor.

## WHAT MAKES THE DIFFERENCE?

**THE STRENGTH OF THE BRAND** : ERARD® has been present on the integrated audiovisual system market for over 50 years. Its products are recognized for their quality design and workmanship.

**ORIGINE FRANCE GARANTIE** : All products manufactured at our factory in Chavanoz (38) are certified by "Origine France Garantie" (certified 'French Origin Guaranteed').

**10 YEAR GUARANTEE** : Through meticulous design and high-quality workmanship, we guarantee all our products for a minimum of 10 years, with some guaranteed for life.

**VISION AND DESIGN** : All of our products are exclusively designed by our R&D department, which is focused on creating stylish, smart and practical products.

Height adjustable screen

Screw set and spacers for OLED screens included

# Mounts and furniture for flat TV screens

## ERARD COMPATIBILITY AND SAFETY INFORMATION

### VESA standard

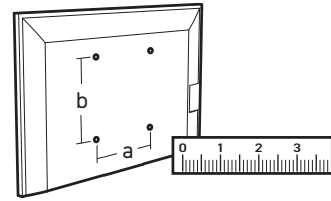

For each ERARD® mount, column and floor stand, there is a pictogram indicating the compatible VESA dimensions.

The VESA standard is the standard followed by TV and wall mount manufacturers.

It specifies the distance between the mounting holes on the back of the TV.

To find out the VESA standard for a television or monitor, simply check the user manual or measure the distance between the mounting holes.

VESA 100 : a = b = 100 mm  
 VESA 200 : a = b = 200 mm  
 etc...  
 VESA 600x400 : a = 600 mm  
 b = 400 mm  
 etc...

### Screen size

For each ERARD® mount, column and floor stand, there is a pictogram indicating the compatible screen sizes.

<b>S</b>	15"-28" 38-71 cm	<b>M</b>	19"-43" 48-109 cm	<b>L</b>	30"-65" 76-165 cm
<b>XL</b>	40"-85" 101-215 cm	<b>XXL</b>	40"-100" 101-254 cm		

This compatibility is given as an indication.

**Larger televisions can be mounted, provided:**

- the TV's VESA measurements are compatible with the ERARD® mount.

- the screen weight does not exceed the maximum weight indicated.

### Screen weight

For each ERARD® mount, column and floor stand, there is a pictogram indicating the maximum admissible weight.

30 Kg

### Screen thickness

For each ERARD® mount, column and floor stand, there is a pictogram indicating the compatible screen thickness.

Maxi  
100 mm

### Safety tests

All of the products developed by ERARD®'s R&D department are designed with a wide margin of safety. Mounts designed for screens weighing less than 30 kg are tested up to 4 times the maximum indicated load. Mounts designed for screens weighing over 30 kg are tested at the maximum indicated load + 88 kg.

## FIXED OR TILTABLE MOUNT

It is entirely possible to install a fixed or tiltable mount on a plasterboard wall of type BA10 or BA13

To do so, we advise beforehand

- to respect any recommendations made by the plasterboard manufacturer
- to ensure that your wall is in good condition
- to use dowels and screws designed for hollow walls (not supplied)

## MOUNT WITH OFFSET

The structure of a plasterboard wall does not allow for the installation of a mount with offset, except when anchoring the mount on a load-bearing wall.

In 2024, ERARD offers you 3 innovative solutions for direct installation on a plasterboard wall.

# HOW TO SELECT YOUR WALL MOUNT FOR FLATSCREENS IN 3 EASY STEPS

**1** What is the screen size ?

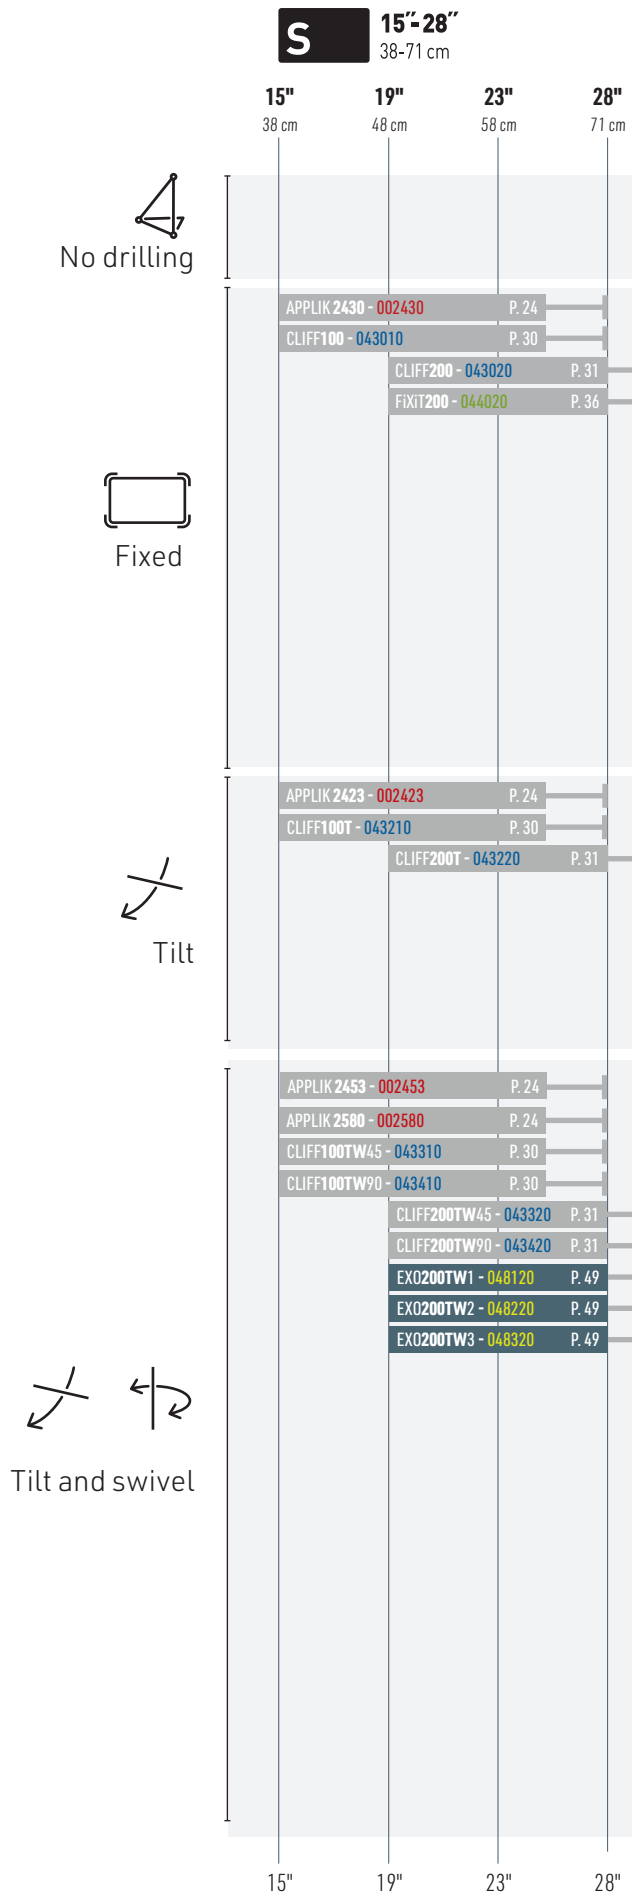

**2** Which functions are required ?

**3** Select your wall mount  
...

... consult the product descriptions\* before making your choice

\*The above chart is based on the technical features of the screens currently available on the market and the features specific to ERARD mounts. Details on these technical features can be found in the product pages of the catalogue.

Customers are asked to factor in the distance between the screen mounting holes (VESA standard) and the maximum mount weight capacity (shown in kilograms) before making their choice.

- 2 mounting sockets + 600 aircraft cable + lock + node fitting

**CLIFF, simple and effective !**

Since being launched, CLIFF mounts have been a hit with consumers and installers. The rounded screen plate, the grooved arms, the built-in spirit level and the choice of colours really make this range stand out from the crowd. And with 14 options to choose from, you are sure to find the right mount for your TV.

- Designed specifically for the installation of CLIFF 200-400-600 T, TW45 and TW90 mounts.
- Delivered with a special magnet to detect the rails, a set of 6 FISCHER screws and expansion tool.

**Do iT - innovation for flat screens**

The consumers and installers we spoke to had two main considerations which we took into account when designing our Do iT mounts: easy and safe installation; and being able to mount the screen as close as possible to the wall (like you would with a painting).

A firm favourite for their eccentric lock washers, which help to compensate for any drilling mishaps, FIXiT, TiLTiT and TWiSTiT mounts also boast an ingenious mechanism for locking and unlocking the screen, allowing any necessary work to be carried out quickly, following installation. Do iT also features STANDiT, the only wall mount with no drilling required! Often imitated, never equalled.

## EXO, Design and Precision !

With its titanium-coloured anodized aluminum arms, EXO is designed to match aesthetic codes of modern TVs. EXO is a very simple mount to install (it comes pre-assembled) and is very pleasant to use. No force is needed, the flexible hinges mean that the screen can be effortlessly moved into the right position.

EXO is also EXOSTAND, a new and unique solution which (finally!) lets you install your mount safely onto a plasterboard wall.

## COMPATIBLE WITH PLASTERBOARD

1ST MOUNT REALLY COMPATIBLE WITH PLASTERBOARD\*

### EXOSTAND, an all-in-one wall mount for plasterboard

The newest addition to the EXO range of aluminium wall mounts.

In response to a growing demand for an offset mount compatible with plasterboard, ERARD designed EXOSTAND.

Formed of a column, a mount and a shelf, this all-in-one solution is the first of its kind to be properly compatible with plasterboard walls.

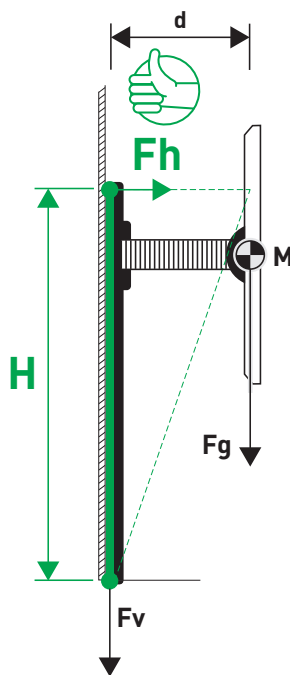

With EXOSTAND, gone are the days of fastening onto wall studs or load-bearing walls.

EXOSTAND also lets you easily adjust the height of the screen and the shelf after installation.

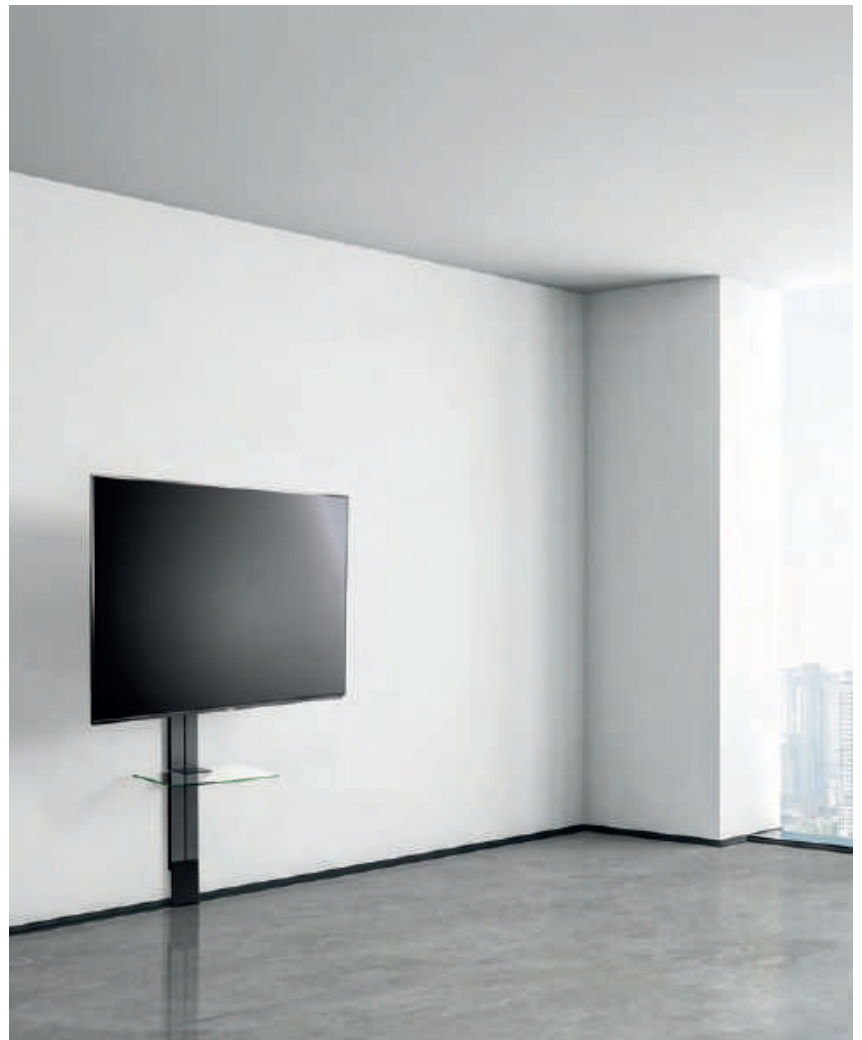

### EXOSTAND A new concept for plasterboard walls

With its T shape and tall, rigid structure, part of the load is absorbed by the ground, meaning 6 times less stress on your wall

$$F_h = M \times G \times d / H$$

**F<sub>h</sub>** = horizontal tensile force (Nm)  
**M** = mass at the center of gravity (Kg)  
**G** = gravitational constant (9.81)  
**d** = distance from the centre of gravity (m)  
**H** = height between top and bottom points (m)

\* Our pull tests conducted with a load of 123 kg on common plasterboard type "BA13" (thickness 12.5 mm) guarantee a perfect fix on your wall, without the need to attach to the studs.

**KANA, and anything becomes possible!**

KANA is the latest addition to the ERARD TV stands. True to its origins, it conveys the values of the brand : stylish design, quality manufacturing, ease of installation and pleasure of use! Supplied with a set of caster wheels (designed by Philippe Starck) and fixed feet, it can be moved around or fixed in one place. Equipped with a rear cable cover, keeping cables out of sight,

and enhancing the focus on the screen. Made of wood or metal, it adapts to all surroundings (home, business) and all styles. Finally, the ability to adjust the height of the screen along the entire length of the column and its compatibility with all types of screen (OLED, QLED, LED, Micro LED, LCD) make it a truly universal product.

**LUX UP and LUX-UP T: show off your screen!**

Whether it is for your home or your business, in your living room or in the classroom, LUX UP is a great way of showcasing your TV. A genuine alternative to wall mounts (the screen is suspended, but the wall remains intact), with a stylish design and a stunning finish, LUX UP is a popular choice among both private customers and professionals.

LUX UP T is an upgrade on LUX UP. With a rectilinear base that allows you to get as close as possible to the wall, a reversible head that gives you significant scope for adjusting the height of the screen and a highly flexible screen tilt/swivel system to prevent glare, you can install your television in any room, no matter the style, with unrivalled levels of performance.
