

FUNC MOTORIZED EXTENSION KIT

When you need to stand tall

An easy way to increase the height on Func Motorized products

Sometimes you want the display to rise further from the ground.

Maybe you have a large display that is partly hidden behind a desk or conference table or you have a touch display in combination with tall users? This extension kit will add 225mm extra height to your motorized Func Mobiles and Wall/floor stands. The extensions are placed on top of the motors and are often hidden behind the display when being used.
