Product Description

Zens adds an extra dimension to furniture which stands for comfort and user friendliness. No more fumbling with plugs and sockets, but an integrated wireless charger. Simply place your device on top of the built-in charger and your device will be charged automatically. Simple and efficient.

The PuK 3 is equipped with one very large coil which automatically starts charging as soon as a Qi device is placed on top of the charger. It allows you to turn almost any flat surface into a wireless charging spot with no visual impact on design aesthetics.

The PuK can be installed in almost any material (except steel) and is widely applicable to a wide range of usage situations. It is particularly used in bedrooms, furniture, hospitality, kitchen and the workplace, but continues to expand to other areas of use.
