Product Description

Integrating the PuK Combi charger will ensure a clean desk and working environment without unnecessary cables and adapters hanging around. With the 5W wireless charger you can charge your Qi-compatible device such as a smartphone or headphones.

In combination with the 5W wireless charger, the PuK Combi offers an integrated power socket (220V/230V). By using this power socket any laptop, tablet or other device that requires power, can be charged. There are three different plug types available.

Features

- Built-in wireless charger: turn any flat surface into a wireless charging spot
- Chargers one device via the integrated 220V/230V power socket (laptop e.g)
- Case friendly works with most lightweight cases (< 3 mm)
- Mold included for easy and accurate installation.

Qi certified
